### **SECTION 2: Hazards identification**

### 2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 12	72/2008)
Skin irritation, Category 2	H315: Causes skin irritation.
Serious eye damage, Category 1	H318: Causes serious eye damage.
Skin sensitisation, Category 1	H317: May cause an allergic skin reaction.
Long-term (chronic) aquatic hazard, Cat- egory 2	H411: Toxic to aquatic life with long lasting effects.

### **SECTION 4: First aid measures**

4.1 Description of first aid measures				
General advice	:	Keep warm and in a quiet place. Show this safety data sheet to the doctor in attendance. Take off all contaminated clothing immediately.		
If inhaled	:	Move to fresh air. Keep patient warm and at rest. If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician. If breathing is irregular or stopped, administer artificial respira- tion.		
In case of skin contact	:	Wash off immediately with soap and plenty of water. Do NOT use solvents or thinners. If on clothes, remove clothes. If skin irritation persists, call a physician.		
In case of eye contact	:	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If eye irritation persists, consult a specialist. If easy to do, remove contact lens, if worn.		
If swallowed	:	Keep at rest. Do not induce vomiting without medical advice. Keep respiratory tract clear. If symptoms persist, call a physician.		
4.2 Most important symptoms and effects, both acute and delayed				
Symptoms	:	irritant effects Redness sensitising effects		
4.3 Indication of any immediate	mer	dical attention and special treatment needed		
Treatment	:	The first aid procedure should be established in consultation with the doctor responsible for industrial medicine.		
SECTION 5: Firefighting measures				
5.1 Extinguishing media				
Suitable extinguishing media	:	Foam Sand Carbon dioxide (CO2) Water mist		
Unsuitable extinguishing	:	Water spray jet

### 5.2 Special hazards arising from the substance or mixture

	Specific hazards during fire- fighting	:	The pressure in sealed containers can increase under the influence of heat. Cool closed containers exposed to fire with water spray.
5.3	Advice for firefighters		
	Special protective equipment for firefighters	:	In the event of fire, wear self-contained breathing apparatus. Use personal protective equipment.
	Further information	:	In the event of fire and/or explosion do not breathe fumes. Use extinguishing measures that are appropriate to local cir- cumstances and the surrounding environment. Immediately evacuate personnel to safe areas. Prevent fire extinguishing water from contaminating surface water or the ground water system. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

### **SECTION 6: Accidental release measures**

### 6.1 Personal precautions, protective equipment and emergency procedures

Evacuate personnel to safe areas. Use personal protective equipment. Ensure adequate ventilation. Inform the responsible authorities in case of entry into waterways, soil or drains.	gas leakage, or of
---	--------------------

#### 6.2 Environmental precautions

Environmental precautions : Do not allow uncontrolled discharge of product into the environment. Try to prevent the material from entering drains or water courses. Local authorities should be advised if significant spillages

cannot be contained.

#### 6.3 Methods and material for containment and cleaning up

Methods for cleaning up	<ul> <li>Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).</li> <li>Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, ver miculite) and place in container for disposal according to loc / national regulations (see section 13).</li> <li>Pick up and transfer to properly labelled containers.</li> </ul>	r-

### **SECTION 7: Handling and storage**

### 7.1 Precautions for safe handling

	Advice on safe handling	:	Provide sufficient air exchange and/or exhaust in work rooms. Avoid inhalation, ingestion and contact with skin and eyes. Wear personal protective equipment. Persons with a history of skin sensitisation problems or asth- ma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used.
	Advice on protection against fire and explosion	:	Keep away from open flames, hot surfaces and sources of ignition.
	Hygiene measures	:	Provide adequate ventilation. Wash hands and face before breaks and immediately after handling the product.
7.2	Conditions for safe storage,	incl	uding any incompatibilities
	Requirements for storage areas and containers	:	Keep containers tightly closed in a dry, cool and well- ventilated place. Keep in properly labelled containers.
	Advice on common storage	:	Keep away from oxidizing agents, strongly acid or alkaline materials and amines. Keep product and empty container away from heat and sources of ignition. Keep away from food and drink.
	Further information on stor- age stability	:	Stable at normal ambient temperature and pressure.
7.3	Specific end use(s)		
	Specific use(s)	:	Consult the technical guidelines for the use of this sub- stance/mixture.

### **SECTION 8: Exposure controls/personal protection**

### **Engineering measures**

Effective exhaust ventilation system effective ventilation in all processing areas

#### Personal protective equipment

Eye protection	:	Do not wear contact lenses. Safety glasses with side-shields conforming to EN166 Ensure that eyewash stations and safety showers are close to the workstation location.
Hand protection Material	:	Protective gloves complying with EN 374.
Skin and body protection	:	Protective suit
Respiratory protection	:	Use respiratory protection unless adequate local exhaust ven- tilation is provided or exposure assessment demonstrates that exposures are within recommended exposure guidelines. In the case of vapour formation use a respirator with an ap- proved filter. Equipment should conform to EN 14387 Apply technical measures to comply with the occupational exposure limits.

### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures General advice Show this safety data sheet to the doctor in attendance. : Keep warm and in a quiet place. Take off all contaminated clothing immediately. If inhaled Move to fresh air. : Keep patient warm and at rest. If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician. If breathing is irregular or stopped, administer artificial respiration. In case of skin contact Wash off immediately with soap and plenty of water. • Do NOT use solvents or thinners. If on clothes, remove clothes. Burns must be treated by a physician. In case of eye contact Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If eye irritation persists, consult a specialist. If easy to do, remove contact lens, if worn. If swallowed Do NOT induce vomiting. If a person vomits when lying on his back, place him in the recovery position. Call a physician immediately. Give small amounts of water to drink. 4.2 Most important symptoms and effects, both acute and delayed Symptoms • Burn superficial burning sensation Redness Severe irritation

### 4.3 Indication of any immediate medical attention and special treatment needed

Treatment	: The first aid procedure should be esta	blished in consultation
	with the doctor responsible for industr	ial medicine.

### 6.3 Methods and material for containment and cleaning up

Methods for cleaning up	: Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust).
	Contain spillage, and then collect with non-combustible ab-
	sorbent material, (e.g. sand, earth, diatomaceous earth, ver-
	miculite) and place in container for disposal according to local
	/ national regulations (see section 13).

SECTION 7: Handling and sto	SECTION 7: Handling and storage			
7.1 Precautions for safe handling	9			
Advice on safe handling	:	Provide sufficient air exchange and/or exhaust in work rooms. Do not breathe vapours or spray mist. Avoid inhalation, ingestion and contact with skin and eyes. Wear personal protective equipment. Persons with a history of skin sensitisation problems or asth- ma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used.		
Advice on protection against fire and explosion	:	Keep away from open flames, hot surfaces and sources of ignition.		
Hygiene measures	:	Provide adequate ventilation. Wash hands and face before breaks and immediately after handling the product.		
7.2 Conditions for safe storage, i	incl	luding any incompatibilities		
Requirements for storage areas and containers	:	Keep containers tightly closed in a dry, cool and well- ventilated place. Keep in properly labelled containers. To maintain product quality, do not store in heat or direct sunlight.		
Further information on stor- age conditions	:	Protect from moisture.		
Advice on common storage	:	Keep away from isocyanates. Do not store near acids. Keep away from oxidizing agents.		
Further information on stor- age stability	:	Stable at normal ambient temperature and pressure.		
7.3 Specific end use(s)				
Specific use(s)	:	Consult the technical guidelines for the use of this sub- stance/mixture.

Remarks	:	Nitrile rubber
Skin and body protection	:	Protective suit Recommended preventive skin protection
Respiratory protection	:	Use respirator when performing operations involving potential exposure to vapour of the product. The filter class for the respirator must be suitable for the max- imum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when han- dling the product. If this concentration is exceeded, self- contained breathing apparatus must be used. Recommended Filter type: ABEK-filter Equipment should conform to EN 14387
Protective measures	:	Avoid contact with skin. Wear suitable protective equipment.

Effective exhaust ventilation system effective ventilation in all processing areas

Personal protective equipment					
Eye protection	:	Safety glasses with side-shields conforming to EN166 Do not wear contact lenses. Ensure that eyewash stations and safety showers are close to the workstation location.			
Hand protection					
Material	:	Protective gloves complying with EN 374.			
Remarks	:	Nitrile rubber			
Skin and body protection	:	Protective suit Recommended preventive skin protection			
Respiratory protection	:	Use respirator when performing operations involving potential exposure to vapour of the product. The filter class for the respirator must be suitable for the max- imum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when han- dling the product. If this concentration is exceeded, self- contained breathing apparatus must be used. Recommended Filter type: ABEK-filter
